

## TRAILER REFURBISHING SERVICE

### Roll-Off Rebuilds

# ON-SITE FLEET SERVICES

Truck Repair • Service • Maintenance

*Why buy new when we can add 1-2 more life cycles to your trailer at a third of the cost of a new trailer with our refurb program?*

### Keeping Vehicles on the Road and Producing Revenue

On-Site Fleet Services of Florida's Roll-Off Trailer Refurb Program minimizes maintenance expenditures associated with an aging fleet, helping customers decrease the long term purchase costs of a new unit and limits in service down time.

#### Refurb Program Advantages and Benefits:

- Utilize existing assets to refurb to "like new" condition
- Reduce required new unit expenditures by up to 60%
- Reduce breakdown frequency and down time
- Reduce in-house repair costs associated with an aging fleet
- Maintenance cost are comparable to new unit maintenance cost

#### Our Refurb Process Uses a Proven Method:

We begin by cataloging all repair and rebuild issues, then inspect the unit to identify reusable parts, repairable parts and replacement parts needed. The unit is completely disassembled down to the bare frame including: hydraulics, roll off frame, rollers, lines, and components.

This complete disassembly process ensures that each of the trailer's operating components are thoroughly inspected. The unit then undergoes all needed steel and body repairs. Once all repairs are completed, the frame and its components are sand blasted and painted. After the frame and the components have been painted, the unit is rebuilt and reassembled. The unit is then completed and prepared for immediate in-service operation.

#### Our Process Addresses All Components of the Roll-Off Trailer:

- Roller Refurbishment
- Roller Brake Replacement
- Air Line Replacement
- Brake Shoes and Hardware
- S-Cams and Drums
- Degrease and Wash
- Welding and Fabrication
